THE 'ROMAN' WAY TO CREATE
AN IMPRESSIVE FABRIC CASCADE APPEARANCE

A photograph of cotton plants in a field, showing several cotton bolls in various stages of maturity. Some are still green and closed, while others are open, revealing the white cotton fibers. The background is a blurred field of similar plants under a clear blue sky.

“ *We believe in being transparent about our efforts to offset the carbon footprint of our company.* ”

Kott - Uniprod Management advocates for environmental care as an important part of the company's culture and is committed to using textiles in an environmentally responsible manner.

▣ **Less waste is created when products last years and years.**

Using high quality and durable materials in the production of Roman blinds, we encourage and facilitate the long-term use of these window coverings.

▣ **We take strides to offset waste during the manufacturing process.**

Waste is safely recycled through incineration, with the heat being used as an additional energy source for our steam network.

▣ **We recommend to our partners the use of eco-friendly fabrics.**

Usually, we try to recommend to our clients and partners eco-friendly materials at the expense of synthetic ones.

STYLE

CREATE AN ELEGANT FREE-FALLING APPEARANCE

**REDUCING LIGHT IN AN ELEGANT
MANNER, MADE OUT OF GREAT
FABRICS, ROMAN BLINDS ARE AN
EXCELLENT BLEND BETWEEN
BEAUTY & FUNCTIONALITY.**

ROMAN BLINDS

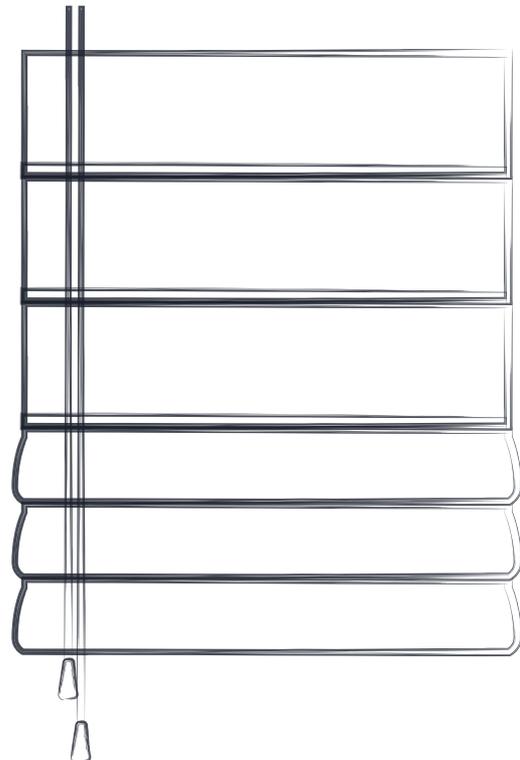

Roman blinds are very versatile and can also be used for decoration purposes only. Adding value to the whole design of the room, our Roman blinds combine the beauty and softness of drapes with the functionality of a shade.

MODERN STYLE

The blinds are manufactured with translucent tape attached to the back of the blind, creating neat equal folds. This type will be used for unlined blinds and voile blinds.

- + It doesn't have visible seams and it's good to use for materials with a pattern.
- None
- ✓ Best for dining rooms and living rooms.

CONTEMPORARY STYLE

The blinds are manufactured with rod pockets made from the same material. This type will also be used for unlined blinds and voile blinds.

- + A greater resistance in time.
- Can create problems with patterned fabrics, as some of the patterns will be interrupted by the pockets.
- ✓ Best for living rooms, bedrooms, and bathrooms.

CLASSIC STYLE

This type is used for lined blinds. There are 3 types of lining that we use to manufacture blinds for domestic use (standard, thermal, and blackout) and 2 types for commercial use (standard FR and Blackout FR).

- + Good versatility, giving excellent privacy and light control.
- Not suitable for all windows as they can look too busy.
- ✓ **Best for bedrooms and kids' room.**

ROMAN BLINDS

COLLECTIONS

SPECIAL MATERIALS IN NEW TRENDS

**WE WORK WITH LEADING
MANUFACTURERS OF TEXTILES
FROM ENGLAND, SPAIN, HOLLAND,
GERMANY, AND FRANCE.**

ROMAN BLINDS

Filter the sunshine with our sheer materials or block the light with special linings. We bring exquisite materials in new trends of design and of high quality.

1.

Collection 1 includes polyester, highly stain-resistant, and easy to maintain fabrics, that are less prone to wrinkles and shrinking.

2.

Collection 2 is dedicated to soft materials and various colors. The main feature of this collection is that it can be used for upholstery, to create a stunning interior.

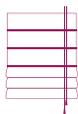

3.

Collection 3 includes fabrics of natural material such as linen or cotton, or a blend between them. Usually, they are simple and double-width materials. Delve into the luxurious fabrics and let nature surround you.

4.

The fine designs of our fourth **collection** include special prints from geometric shapes to abstract drawings, that enable us to create a rich and special collection. The fabrics can be used both in classical and modern arrangements.

1.0

Collection 1.0 is affordable to any budget. We strived to create a very competitive price without compromising on the quality of the fabrics. We sourced our fabrics in the EU for quality, continuity, and control.

ROMAN BLINDS

CONFIGURATION

METICULOUSLY HAND CRAFTED TO PRECISE MEASUREMENTS

WE WORK CLOSELY WITH OUR CUSTOMERS TO CREATE PERSONALIZED ROMAN BLINDS, NO MATTER HOW SOPHISTICATED THEY ARE: CONTRASTING BORDERS, SCALLOPED BOTTOM EDGE, AND OTHER CUSTOMIZATIONS.

ROMAN BLINDS

Our blinds are manufactured on high standard mechanisms, making it easy to lift and lower them to the desired height. Alternatively, choose a cordless motorized mechanism.

CASSETTE SYSTEM HEADRAIL

Very compact, premium quality Roman blinds System with a closed profile for an elegant look.

This system is recognized for its functionality. With the cords, you can determine the height of the blind. The maximum weight of the material should be 35kg.

The system offers a NEW, innovative, child-safe control unit with an internal breakaway mechanism at 6kg. Chain cog only releases in dangerous situations, not in daily use. After release, the chain cog can be placed back into the gear house very easily.

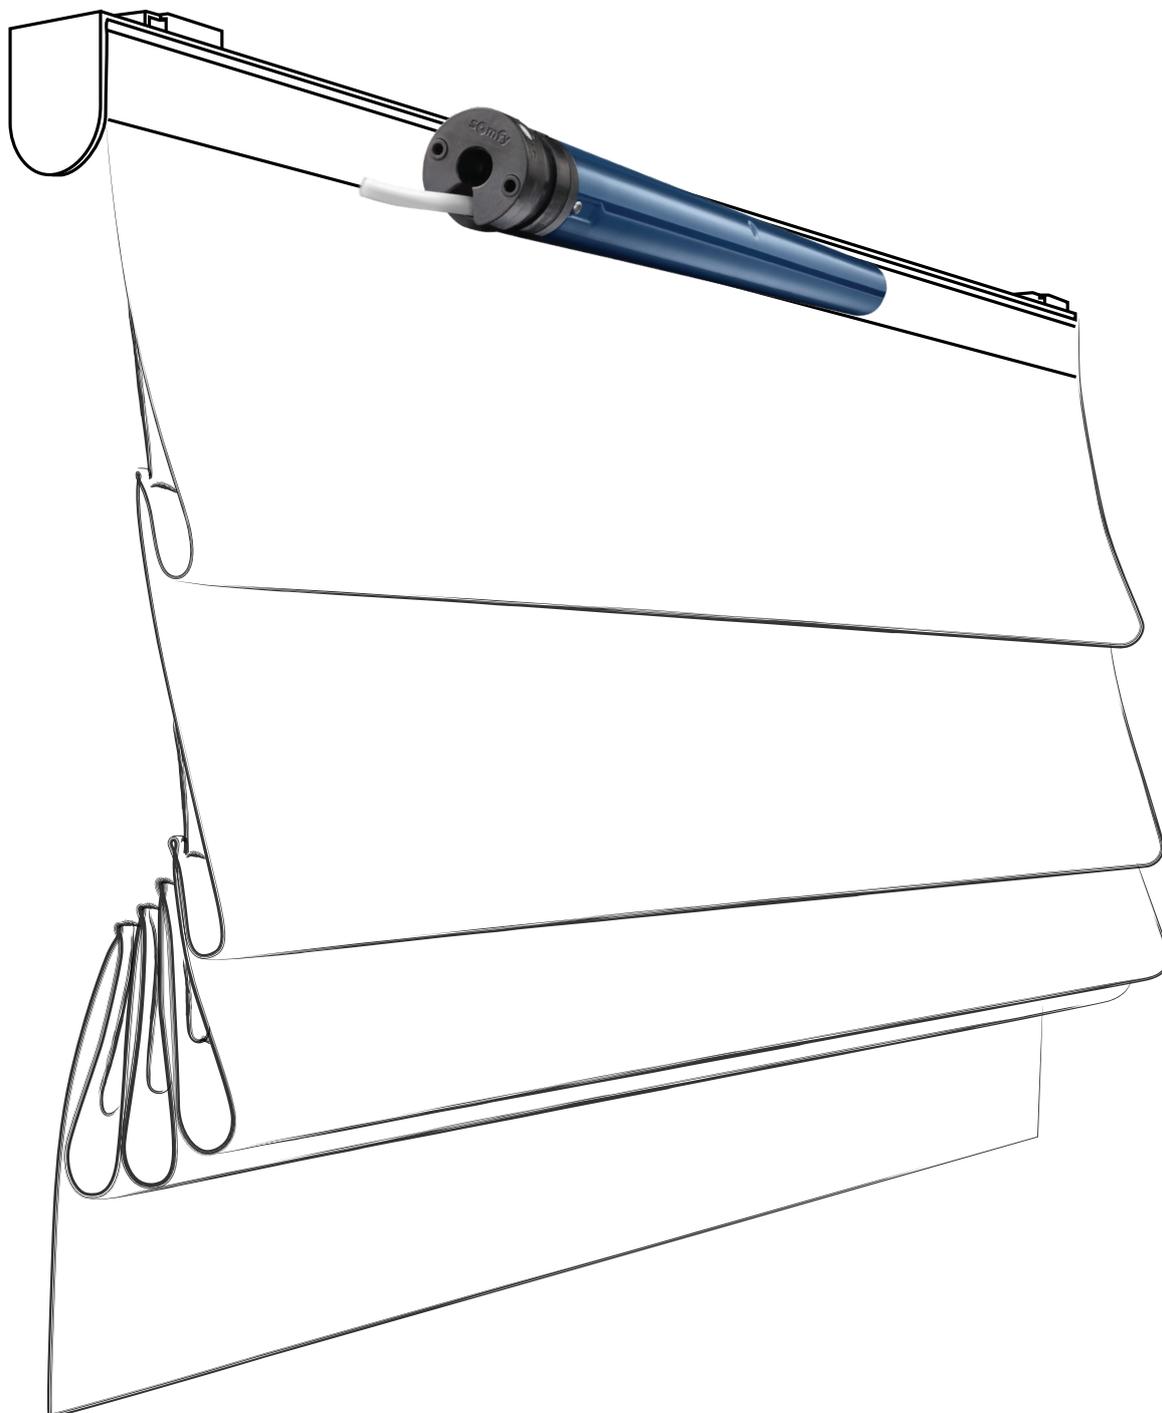

CORD LOCK HEADRAIL

This standard cord-operated System is the perfect solution for plastic window frames and small-sized windows.

The Classic System works with cords and can be operated with a cord lock to determine its height. It is recommended to be used in tight spaces due to its narrow 8,5mm metal profile.

The system has a unique self-adhesive click strip for mounting, no screws are needed, and it can have a maximum of 4 cords.

SILENT MOTORIZATION

- The motorization of the Kott Roman blinds represents an elegant solution for comfort & functionality, a modern refinement that significantly contributes to the digitized lifestyle.
- With the help of TaHoma application, from the mobile phone, Kott motorized blinds can be operated both inside the house and remotely.

AUTOMATIC PROTECTION

- Connected to a sun / light sensor, Kott motorized blinds can be automatically operated to protect the furniture & interior of the home from the sunlight.
- The application can create automatic closing/ opening scenarios at certain times.
