

The image features a close-up of light-colored wood venetian blinds. A large, vibrant red geometric shape, resembling a stylized arrow or a large 'K', is superimposed over the right side of the blinds. The blinds are partially open, showing the horizontal slats and the central cord mechanism. The red shape has sharp, angular edges and a solid color, creating a strong contrast with the natural wood texture.

WOOD VENETIAN
BLINDS

GET EXCITED BY THE GORGEOUS TEXTURE &
NATURAL FEATURES OF REAL WOOD

“We have chosen the ethical and responsible development out of respect for the environment...”

The wood represents the raw material for Kott Venetian blinds. Therefore, we do take very seriously the responsibility towards the environment. The manufacturing process of the Kott products is realized in a social, ethical, and responsible way.”

▣ **All our wood comes from rigorously checked suppliers.**

We do love nature, and because of that, we make sure that all the materials used come from legal and sustainable resources.

▣ **The waste and production costs are reduced to a minimum.**

Because Kott products are only made to measure, the wood waste and the production costs are drastically reduced.

▣ **Ecologically planned, our transport is at regular intervals of time.**

The Kott products are being delivered efficiently only when necessary. This way, the carbon emissions are minimized.

APPROACH

We are a family-run manufacturer who believes in treating everyone as if they're a part of the family. We apply this approach to employees, customers, and everyone in between.

VALUES

We believe in treating others as we wish to be treated. We believe in having positive attitudes and in always pursuing excellence. And we believe that in order to lead we must serve. At Kott our core value is integrity.

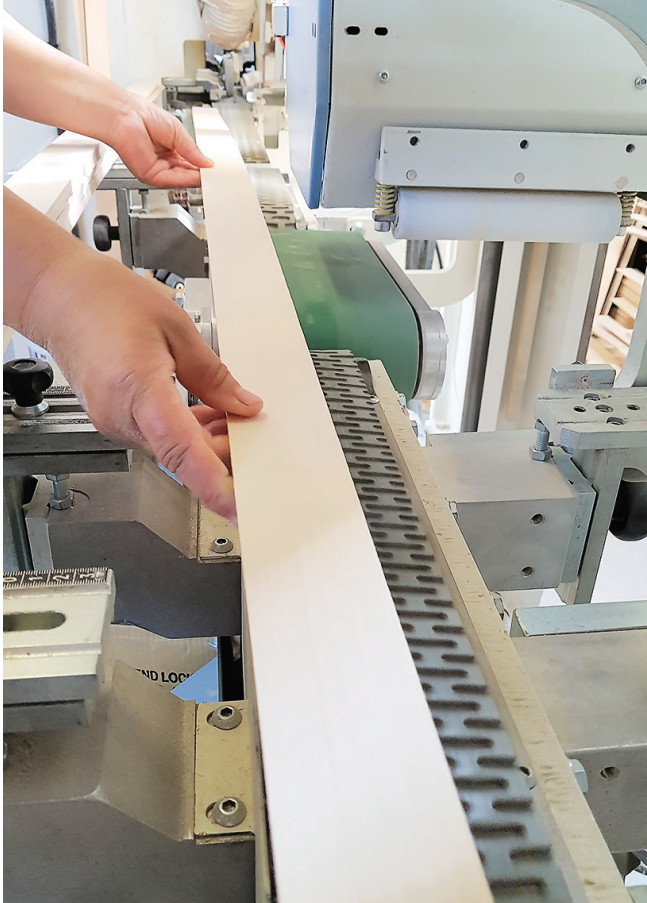

TEAM

We also believe in the quality and craftsmanship of the Romanian laborer. Kott proudly manufactures custom window treatments in facilities located around Bacau, Romania.

ABOUT

COMPANY

SOCIAL

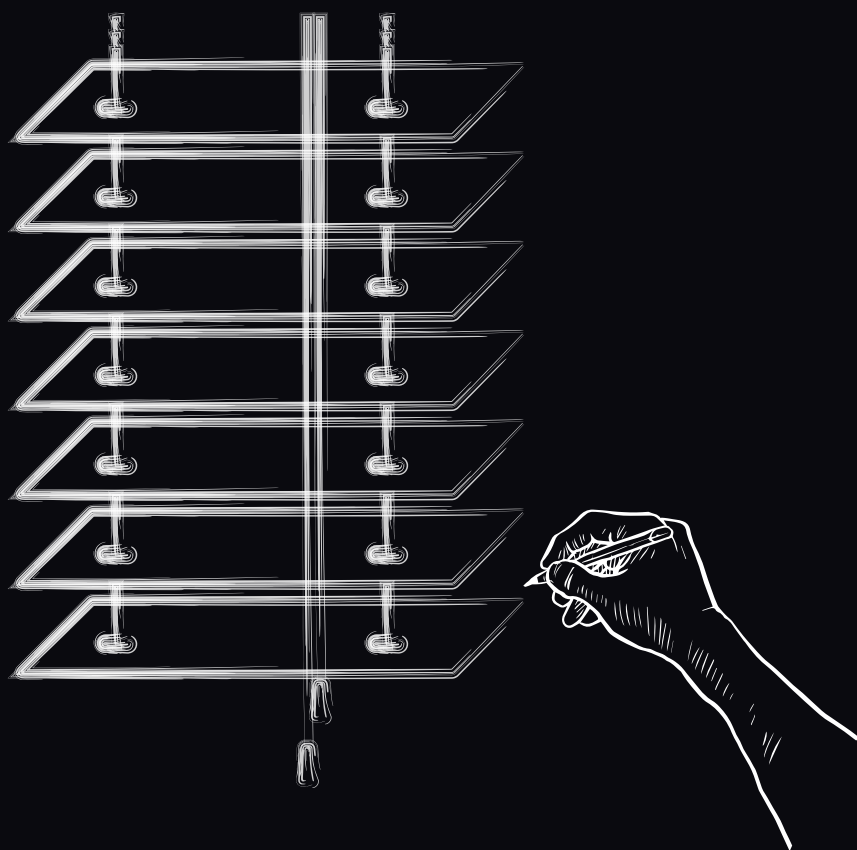

Our social goal is to educate our audience to appreciate/understand the beauty of raw materials - the wood, the knots, the fiber, the color variations, and the simple imperfections that will make your Venetian blinds unique.

MISSION

Our mission is to enhance creativity and personality by handing tools and direction for those who want to hone their passion for décor, interior design, and DIY projects.

PROMISE

For more than a decade, tradition, respect for wood, and a passion for manual finishes have been fundamental elements in Kott's culture. The experience, professionalism, and dedication of Kott specialists ensure the delivery of outstanding products.

OUR

PHILOSOPHY

TECHNOLOGY

The culmination of ten years of research, re-imagining, and refinement represents our “form follows function” philosophy in its original, groundbreaking format.

All these years, we believed in four principles to be the foundation for great Venetian blinds: high efficiency, low distortion, sustainability, and maximum comfort. They continue to drive the manufacturing process of every new Kott Venetian blinds, today and tomorrow.

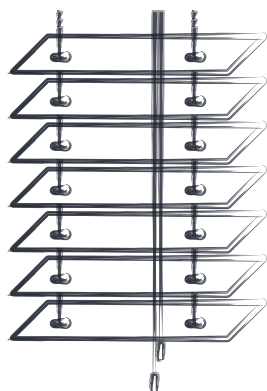

We are committed to providing the finest quality Custom Window Treatments, a great value, and exceptional customer experience.

VENETIAN BLINDS

Real wood Venetian blinds strive to maintain the highest expectations of quality engineered window treatments and blaze new trails in design, style, and comfort, which we're all about!

REAL OAK WOOD

Oak is a noble, precious wood, ideally representing the definition of luxury. Oak has a special versatility and is suitable for any type of design, classic or modern. The wood fiber is hard, irregular, forming an impressive organic appearance.

Our oak Venetian blinds are oiled so the wood can breathe and have a lustrous finish. Other methods such as waxing and manual antiquing are used to highlight the natural structure.

The predisposition of this type of wood to deformation is minimal.

BASSWOOD

Basswood is the perfect material for Venetian blinds; it has good bending properties, is lightweight and easy to handle, resilient, and sturdy.

The fiber is straight, homogeneous. The texture is fine, uniform, with a glossy granulation. The slats are heat-treated and scratch-resistant.

Due to variations in color and structure (knots & dark streaks), the appearance of the final product highlights the beauty of the mix of shades and textures, offering an extra style and elegance.

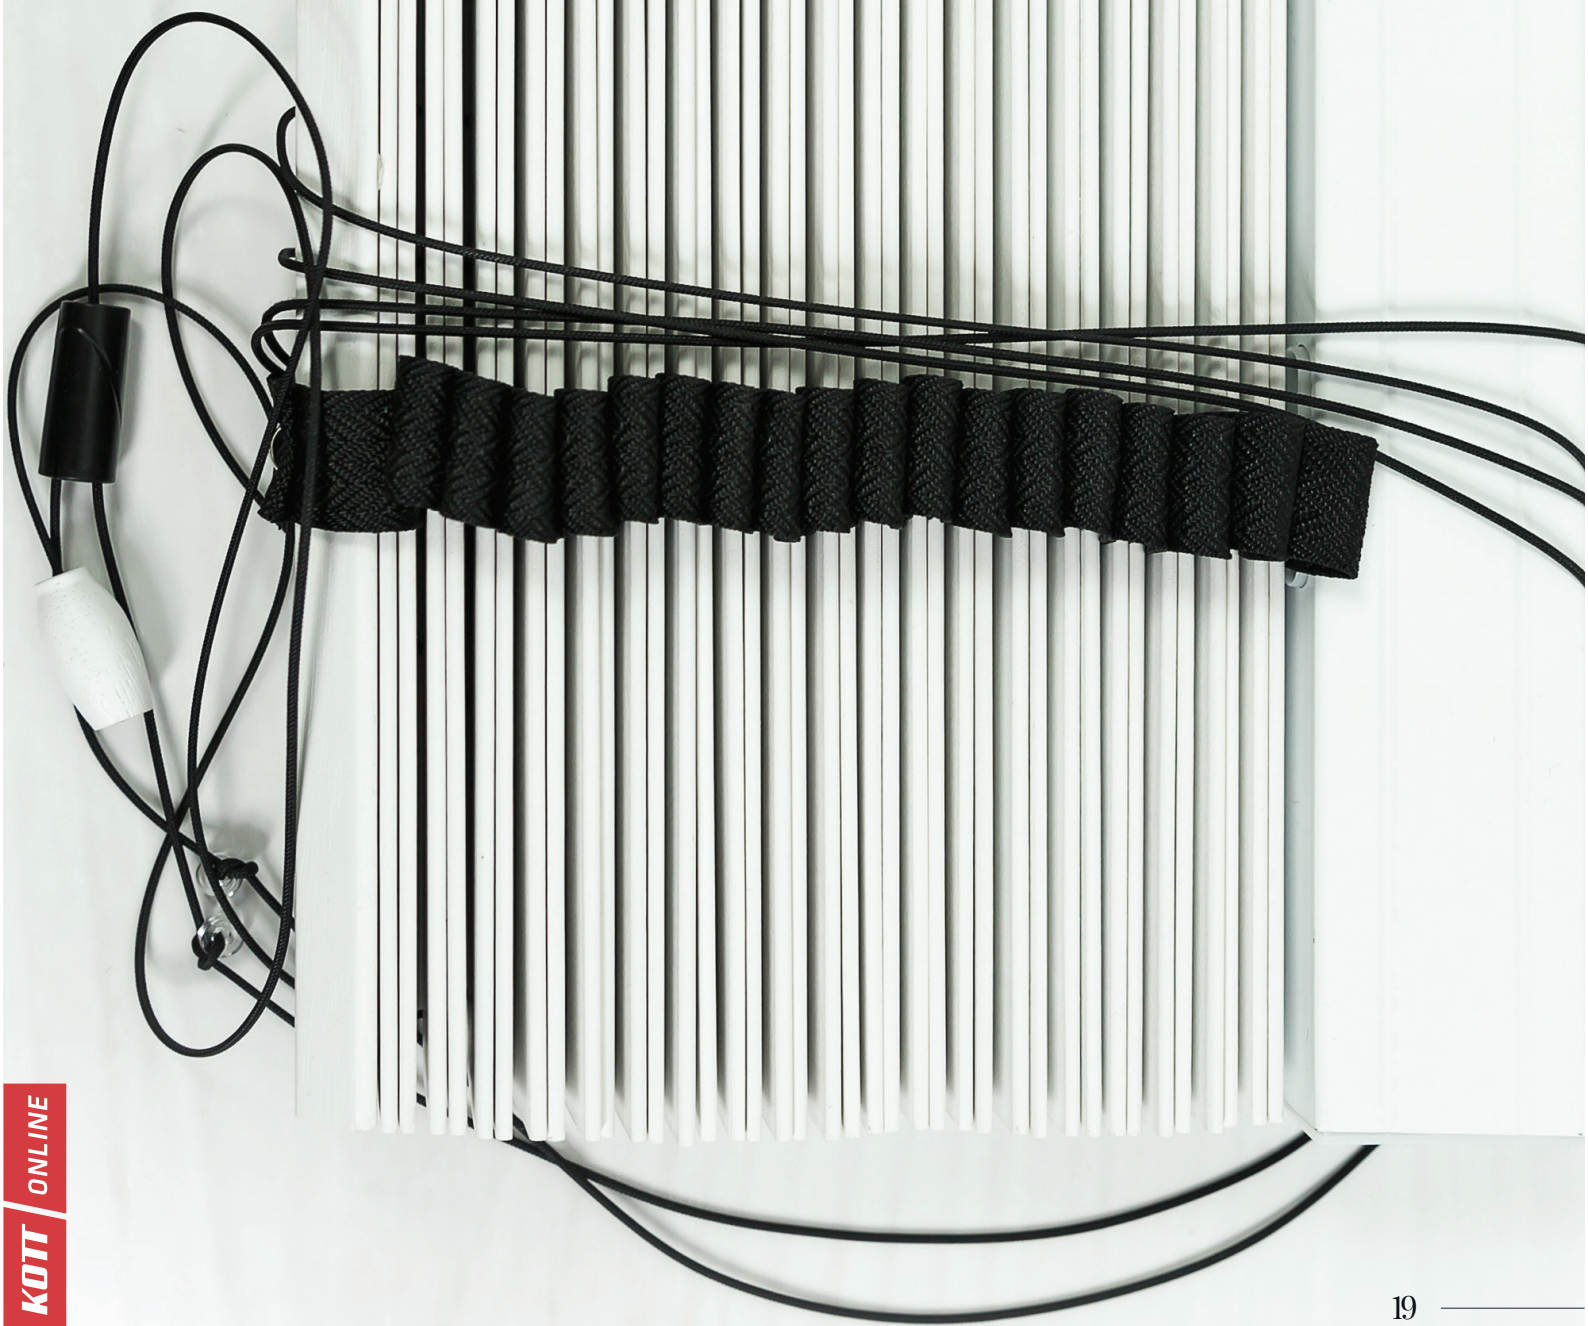

AYOUS
WOOD

Called a "cold" tree because unlike other kinds of wood it does not heat up, Ayous is the lightest low-cost utility hardwood. Having such particular characteristics, it is often used in the manufacturing of large blinds.

The wood is creamy-white to pale-straw as color and can have variations of minerals, knots, and colors.

Due to its unique qualities, the Ayous wood does not crack, does not deform, and can be manually antique by various processes, to give it a unique/personalized appearance.

VENETIAN BLINDS

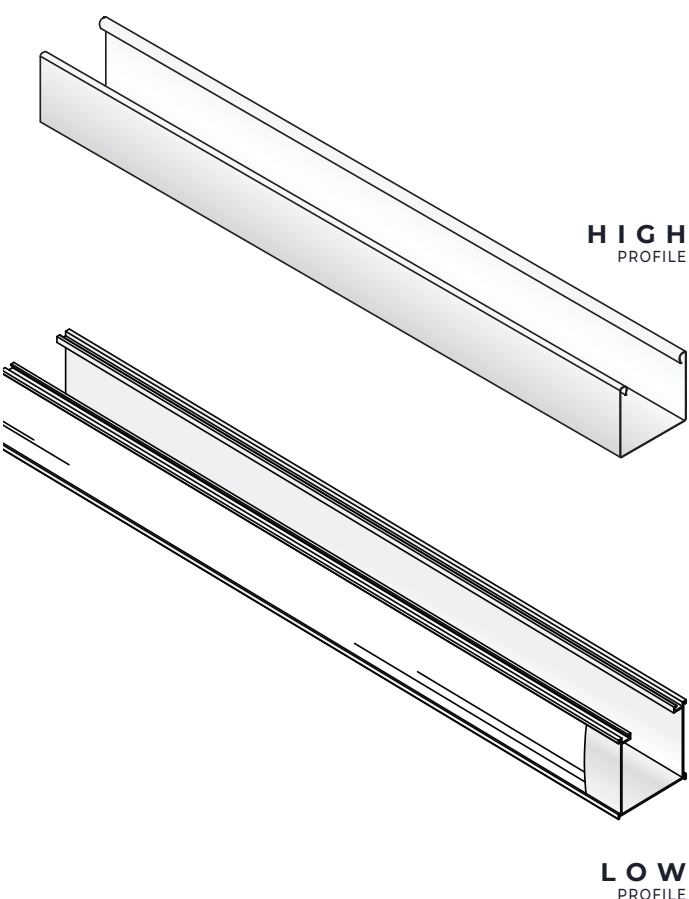

CONFIGURATION

PRACTICAL, HORIZONTAL SLATTED BLINDS

THE MOST COMMON SETUP FOR WOOD VENETIAN BLINDS INCLUDES THE SLAT SIZE, TILT MECHANISM, LIFT CORD, CORD LOCK, BOTTOM RAIL, TASSELS, AND LADDER CORD.

VENETIAN BLINDS

To determine the correct window blinds configuration, important factors such as window shapes and sizes, lighting preferences, privacy, existing room decor, and the human factor must be considered.

METALLIC PROFILE

HIGH PROFILE

With a dimension of W50 x H58mm, the High Profile is used for the 50mm slat size with ladder string or decorative ladder tape. For the 35mm slat size, the profile is used together with decorative ladder tape.

LOW PROFILE

With a dimension of W37 x H41mm, the Low Profile is used for the 35mm slat size with ladder string. For the 25mm slat size, the profile is used together with ladder string or decorative ladder tape.

Made from carbon steel, the metallic profile is available in different colors: white, cream, beige, brown, black, and custom. The installation can be made on the ceiling or the wall and inside or outside the recess.

LADDER OPTIONS

LADDER TAPE

We use durable polyester decorative ladder tapes to support the 25mm, 35mm, and 50mm wooden slats. The functional ladder tape is a generally accepted option for covering the route holes in the slats and blocking the light.

We offer 16 standard colors for ladder tapes, which can be combined with more than 70 slat colors, creating either random unique designs either a perfect match.

LADDER STRING

For simplicity or a discreet look, regular ladder strings are a great option. Made of strong polyester fiber, our ladder strings are available in 16 popular colors, from light to dark.

OPERATING SYSTEM

SINGLE CHAIN

The main advantage when using a single chain is that the other wires have been removed and the blind is operated only by a chain control that can be installed either on the left or on the right side.

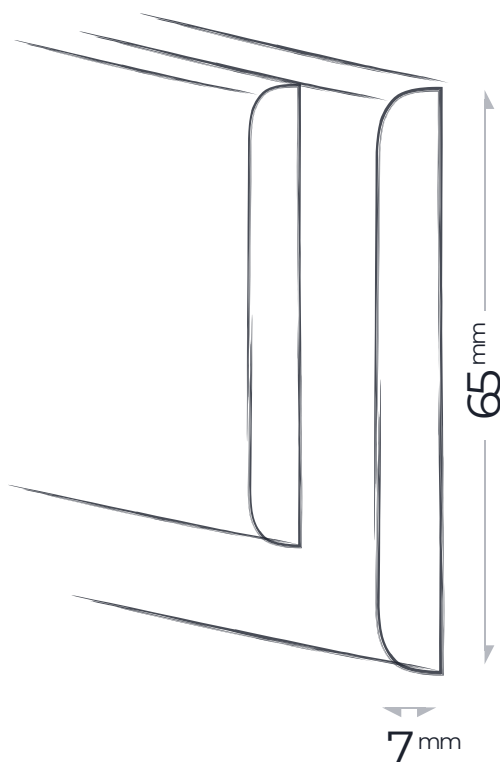

This operating mechanism ensures the blind constantly stays level when lifted, and that the slats can be angled more accurately.

WIRED

The controls come installed, default, as follows: on the right side - the Cord Lock; on the left side - the Tilt Mechanism. The controls installed on the same side are possible only for blinds with a width of more than 420mm. Other custom setups are available on demand: Right to Right, Left to Right, and Left to Left.

The cords are grouped into a breakaway connector that disengages the pull cords when force is applied on it, respecting the safety rules.

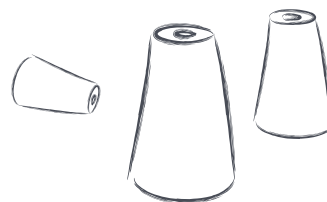

The blind also comes with child safety clips, which need to be installed on the wall.

DECORATIVE VALANCE

The Valance is a decorative mask for the metallic profile. It comes default in the same color and material as slats, it has a D-shaped profile, 65mm width, and is 7mm longer than the metallic profile. Optional fitting of side edges can be chosen to completely cover the metallic profile when the blind is installed outside the recess.

We can offer a singular valance for covering several blinds with a width of a maximum of 3500mm (Basswood up to 3500, Oak up to 2900mm, and Ayous up to 2900mm).

TASSELS DECO

Having a bean form, tassels are available in the color and material of the slats.

CORDS NUMBER

The number of cords can go up to 6, and the maximum space between the holes is 650mm.

Default, side cords are installed on heads at 125mm. When the controls are on the same side, they will be installed at 150mm.

If several blinds are to be fitted side by side, it must be specified in the order form if the same number of cords are desired. We can offer this service as long as we do not exceed 650mm distance between holes.

65 mm	✓	✓	✓	400 mm	300 mm	2900 mm	3600 mm

*1. Atypical structure

The product has slats of different sizes.
(Custom blinds for windows with special shapes)

*2. Inside fitting

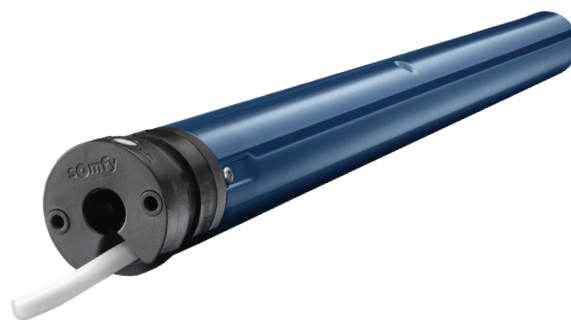

Installation of the blind inside the window.
(The window sill and handle must be considered because they can prevent installation)

*3. Motorized control

The blinds can be operated with the help of a remote control, smartphone application or wall control.
(engine is provided by Somfy Sonesse 40 RTS / WT)

MEASURING & INSTALLING

- Can be installed inside or outside the recess.
- For measuring inside the recess, need to be sure no obstacles (ex: handle) can affect the installation. Measurements must be taken at 3 different points (top, middle and bottom) both in width and drop, choosing the lowest value.
- Swivel brackets are used for installation in standard. On request, box brackets can also be provided.
- For widths bigger than 120 cm, center supports are provided for better support.
- If the sizes are communicated as internal recess we automatically deduct 10mm to be able to operate the blind.

SILENT MOTORIZATION

- The motorization of the Kott blinds represents an elegant solution for comfort & functionality, a modern refinement that significantly contributes to the digitized lifestyle.
- With the help of TaHoma application, from the mobile phone, Kott motorized blinds can be operated both inside the house and remotely.

AUTOMATIC PROTECTION

- Connected to a sun / light sensor, Kott motorized blinds can be automatically operated to protect the furniture & interior of the home from sunlight.
- The application can create automatic closing / opening scenarios at certain times.

ADVANTAGES

- It is the ideal solution for the control of heavy, large blinds;
- The blinds can be operated using a wall switch, remote control or smartphone;
- The remote control offers the possibility to rotate the slats and to open / close the blinds;
- With the same remote control several blinds can be operated individually or grouped;
- The engines are compatible with Alexa, Apple and Google Smart Home modules.

VENETIAN BLINDS

SWATCHES

RANGE

Whether your personality is bold or soft, whether your room decor is contemporary or classic, we have a color to suit your style. You can choose from crisp whites to warm natural timber stains.

FASCINATING

Carefully selected in accordance with the fiber and texture of each type of wood, our paints fascinate either refracting light in a multicolored twilight or absorbing light through a matting effect.

PREMIUM

The resistance & durability of our finishes following the heat treatment, varnishing, and dyeing processes are appreciated internationally.

SWATCHES

Our swatches catalog is designed as an initial guide to the colors and types of wood available for Kott Venetian blinds.

However, experience has shown that printed versions of paints, varnishes, and textures cannot in all cases reproduce the appearance of the original color!

Please discuss color preferences with a Kott consultant. This way, you shall be able to see the original colors & textures, and you can be assisted with any request.

Venetian blinds are an aesthetic way to block out prying eyes & adds an extra layer of security.

Window treatments add extra value and are a long term investment to any home.

The blinds are low maintenance; an occasional quick wipe down is all they need to keep clean.

Flexible and durable, Venetian blinds can be custom made to fit the odd size or shape of a window.

Available in a variety of colors and patterns, these functional ladder tapes, elegantly disguise the cords and route holes of the blinds.

According to European legislation, Kott Venetian blinds are fitted & delivered as standard with a cord condenser.

KEY FEATURES

Venetian blinds have a 3-years warranty for wooden elements and a 5-years warranty for metallic components and motors.

Order up to 8 free samples to make an informed decision on which design is right for your interior.

The raw material is obtained from several accredited forest sources. For each tree cut another is planted.

International delivery is available, the price will be calculated during the checkout process.

A durable and robust surface that resists cracking or chipping. Won't warp, stain, shrink or peel.

Wood Venetian blinds have a better natural heat resistance than vinyl and PVC products.
